

Waste Electrical and Electronic Equipment (WEEE)

Our commitment to protect the environment

Labomat Essor is an eco-citizen company which takes its responsibilities regarding environment and adheres to the provisions of directive WEEE :

Labomat Essor markets products for professional use and is registered as such with the ADEME.

We are committed under the WEEE directive that the use and disposal of our products are made in order to protect the environment.

The instruments proposed by Labomat Essor should not be released into the wild or placed in municipal waste dumps or in the collection of garbage.

In general, our business customers recycle their used instruments through their own channels.

In case this is not possible, we gladly offer a recycling service :

Recycling service WEEE

Treatment is free for a device purchased from Labomat Essor, returned prepaid and accompanied by a document specifically marked « FOR RECYCLING ».

We can arrange to make a collection of your devices to be recycled, but this is at your expense.

Please contact us for more information.
